NORDIC

Expanding life.

*Nordic, thoroughly
aerodynamic.*

THE BEST OF BOTH WORLDS.

Nordic. Surprisingly spacious.

The aerodynamic appearance of the Hapro Nordic conceals the outstanding spatial capacity of this roof box. The Nordic offers the best of both worlds, with a low-level design that is both attractive and practical, ensuring that you can effortlessly enter most car parks. A winning combination of design and technology. Wherever you're headed, the Nordic provides a consistent performance with outstanding convenience, safety and reliability. **Are you ready to expand your life?**

SLIMFIT.

A model that fits all.

Taking the car on a holiday? Then you'll almost certainly need some extra space. The Hapro Nordic has been specially designed for adventurous holidays, including winter sports. The Nordic is a slim fit roof box model – everything fits, and the space stretch feature adds to the ease of use. Its low-level design ensures there are no obstacles when entering the majority of car parks and other spaces. Plus, its outstanding quality ensures safety and comfort on the road!

AERODYNAMICS WITHOUT CONCESSIONS.

An intelligent design.

The sleek, efficient design of the Hapro Nordic makes it highly aerodynamic, and with intelligent design choices, there are no compromises when it comes to content. With the stylish Hapro Nordic, there need be no concessions – it's your unconditional partner on any journey.

SAFETY ABOVE ALL. The Hapro Nordic offers more than just good looks, space and comfort – when it comes to safety, there are no concessions. The Nordic has undergone thorough testing in the toughest of conditions, including city crash tests, stability tests, vibration tests, water tests, and aerodynamic simulations. And the result? The Hapro Cruiser endures whatever is thrown at it, and comes with TÜV certification.

Material and colour:
The strong and shock-resistant ABS/PMMA synthetic materials of the Hapro Traxer are highly UV-resistant.

Opening:
Loading and unloading the Nordic is simple due to the double function of the dynamic spring struts. It opens the lid and keeps it in its optimum position while loading. When closed they pull the lid to the base of the roof box for a perfect seal.

Opening:
The Nordic can be opened on both sides. An extremely comfortable feature, allowing maximum ease of loading and mounting.

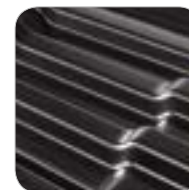

Aerodynamic design:
Nordic's flat and aerodynamic shape has been designed to cut through the wind.

Mounting:
The unique patented Premium-Fit guarantees a quick, secure and easy mounting of the roof box.

Locking:
The exclusive central locking system is a feature that locks the box securely and tightly in three places - in one movement. As an additional safety measure the key can only be removed if the roof box is locked in the correct manner.

Base reinforcement:
The metal reinforcement rails over the entire length of the bottom provide strength and stability.

START PACKING.

as if you have an extra car...

OVER THE MOON.

Flying high.

Start your journey to the mountains and take as much as 75 kg of additional luggage along! The Hapro Nordic is the ideal solution for getting your winter sports equipment to the peaks both safely and conveniently. It can comfortably accommodate as many as 8 or 9 pairs of skis with a maximum length of 2.20 m and, thanks to its aerodynamic design and lowered base, you'll experience less wind resistance while driving.

THE CONVENIENCE FACTOR.

The unique mounting of the Nordic.

The unique patented Premium-Fit is a complete, one-piece unit. No hassle with separate clamps or other accessories. The Premium-Fit allows a quick, easy and above all safe mounting of the roof box. Mounting and removing the roof box is done with a simple and smart turn of the rotating knob, which deploys special clamps around the roof rack. The reassuring ratchet noise tells you exactly when the roof box is securely fixed to the roof bars. Due to its limited height, the Premium-Fit system allows for even more space for your luggage.

SAFETY FIRST.

Welding would be the lesser option.

The Nordic is attached to the roof racks with four Premium-Fits that can be shifted separately. Each one centers itself on the roof rack, which makes the Premium-Fit a perfect fit for any roof rack system with a maximum width of 95 mm. The clamps are covered with a synthetic material for extra grip and to protect the roof rack. Of course the Premium-Fit system has been thoroughly tested. The roof boxes are certified following the strict ISO 11154 and TÜV safety regulations.

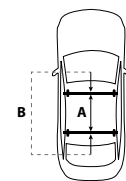

SPECIFICATIONS.

All ins and outs.

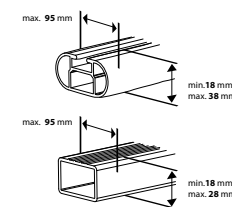

The Nordic is suitable for all standard roof rails. An adapter kit with T-lock profile is available for attachment to aluminium roof rails.

Distance between roof carriers in mm:

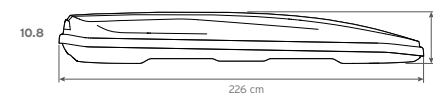

A = min. 550 mm
B = max. 950 mm

Maximum width roof bars mm:

Outside dimensions:

Brilliant Black

Specifications	
L x W x H outside	226 x 94 x 32 cm
